## ENGINEERED FOR BETTER REBOUND CONTROL

FEATURING A FLAT FACE CONSTRUCTION THAT MINIMIZES GAPS AND MAXIMIZES COVERAGE, COMBINED WITH A REINFORCED COMPOSITE THIGH RISE FOR ULTIMATE REBOUND CONTROL, THE HZRDUS PX4 GOALIE PADS ALLOW YOU TO CONFIDENTLY REDIRECT PUCKS WHERE AND WHEN DESIRED.

### FRS (FAST ROTATION SYSTEM)

Located on the calf, FRS includes double internal adjustable straps for increased stability and even weight distribution

### 1 NEW COMPOSITE THIGH RISE CORE

A 30% increase in thigh rise stiffness is paired with a more rigid knee stack, enhancing seal to the ice when dropping down and facilitating easier redirection of pucks.

### 2 THINNER THIGH RISE

A 40% thinner thigh rise provides ease in pad overlap when standing up or in butterfly. The pads are more reactive when dropping down and popping back up from the ice, giving greater mobility in game situations.

### 3 FLAT FACE CONSTRUCTION

Maximizes coverage and enhances rebound control. Eliminates pucks slipping through, as the flat face design provides a solid barrier, leaving minimal room.

AVAILABLE SIZES: SEE SIZING CHART

## CUSTOM OPTIONS 2024

### BREAK CORE

**NO BREAK CORE**  
THIN STIFF  
THIN XTRA STIFF  
THICK MID STIFF

**SINGLE BREAK CORE**  
THIN STIFF  
THIN XTRA STIFF  
THICK MID STIFF

**DOUBLE BREAK CORE**  
THICK MID STIFF

### OUTER ROLL

**NO BREAK OUTER ROLL**  
STIFFER PAD TO PROVIDE A SOLID SEAL TO THE ICE

**SINGLE BREAK OUTER ROLL**  
ONE BREAK BELOW KNEE FOR FLEXIBILITY & MOBILITY

### THIGH RISE STIFFNESS

THIN XTRA STIFF

THIN STIFF

## ENGINEERED FOR GREATER MOBILITY

THE CATALYST PX3 ARE ENGINEERED TO FACILITATE THE OVERLAP MOVEMENT AT THE TOP OF THE PAD BY INCORPORATING A THINNER THIGH RISE, ALL WHILE MAINTAINING UNCOMPROMISED RIGIDITY THROUGH THE INTEGRATION OF A CUTTING-EDGE COMPOSITE CORE.

### FRS [FAST ROTATION SYSTEM]

Located on the calf, FRS includes double internal adjustable straps for increased stability and even weight distribution

### 1 NEW COMPOSITE THIGH RISE CORE

A 30% increase in thigh rise stiffness is paired with a more rigid knee stack, enhancing seal to the ice when dropping down and facilitating easier redirection of pucks.

### 2 THINNER THIGH RISE

A 40% thinner thigh rise provides ease in pad overlap when standing up or in butterfly. The pads are more reactive when dropping down and popping back up from the ice, giving greater mobility in game situations.

### 3 IMPROVED KNEE STACK RIGIDITY

New knee stack construction and improved rigidity provides greater stability. Combined with the stiffer thigh rise, it allows for more pressure on top of the pads in butterfly, leading to an even better seal to the ice.

The above charts are a guide that will help position each goalie with the right equipment. However, there may be instances where the suggestions are not applicable to an individual player for a number of reasons. We strongly encourage all consumers to consult their local authorized TRUE retail staff who can help validate final gear choice for each individual player's needs.
