CUSTOM GOALIE CATALOG

SINCE 1967, THE LEFEVRE FAMILY HAS BEEN COMMITTED TO INNOVATING GOALIE EQUIPMENT TRUSTED AT THE HIGHEST LEVELS.

And much like the athletes they cater to, their equipment is made to perform. Made to win. **MADE DIFFERENT.**

TRUE by Lefevre continues to challenge the status quo of goalie gear design. Together, we are empowering goaltenders at every stage of the game with the most precise and innovative equipment to perform effortlessly night-in, night-out.

TRUE PADS & GLOVES ARE MOST POPULAR AMONG PRO GOALIES

THE TOP CHOICE AMONG NCAA & CHL GOALIES

CATALYST

The Nitro goal pad is built for goalies who demand precise control without sacrificing mobility. PCS technology locks you securely to the post in RVH, while new face materials and flat knee rolls deliver hard, zone-clearing rebounds. A stiffened, adjustable knee block adds the responsiveness elite goalies expect, with just enough flex to maintain the mobility needed to move efficiently in the crease.

HZRDUUS

The HZRDUUS line is built for goalies who want explosive rebounds and a firm, responsive feel. A stiffer profile drives pucks away on impact, helping you control the crease and eliminate second chances. FRS strapping options promote natural mobility, while the composite thigh rise core enhances butterfly coverage and delivers a strong, reliable RVH seal.

KEY TECHNOLOGIES

FRS

FAST ROTATION SYSTEM

Located on the calf, FRS includes double internal adjustable straps for increased stability and even weight distribution.

XPCS

POST CONNECTION SYSTEM

The patented PCS toe bridge is specifically designed to optimize post seal and improve energy transfer when in the RVH position.

NEW FACE MATERIALS (SCF)

The introduction of our new SCF foam reduces overall pad weight while amplifying rebound performance. This advanced material delivers faster, more controlled rebounds that kick pucks out of danger, giving goalies a crisp, responsive feel and the confidence to direct play while moving efficiently across the crease.

ADJUSTABLE KNEE STACK

The adjustable stiffness knee stack allows goalies to fine-tune their setup by tightening or loosening an integrated strap to achieve their desired stiffness. This customization delivers the perfect balance of comfort and responsiveness, no matter the style of play.

FLAT FACE

The knee rolls are now completely flat with the face of the pads, providing improved rebound control in the knee area.

ENGINEERED FOR GREATER MOBILITY

The Catalyst line is engineered to facilitate the overlap movement at the top of the pad by incorporating a thinner thigh rise, all while maintaining uncompromised rigidity through the integration of a cutting-edge composite core.

NEW OPTIONS FOR 2026

NEW LEG CHANNEL AND CALF OPTION

FRS SMALL now available for sizes 30-34

NEW CORE AND THIGH RISE OPTION

The new Thin Mid Stiff option provides a thinner composite reinforced thigh rise while preserving a similar flex profile to the Thick Mid Stiff option.

1

2

3

FRS (FAST ROTATION SYSTEM)

Located on the calf, FRS includes double internal adjustable straps for increased stability and even weight distribution profile to the Thick Mid Stiff option.

1

LONGER REBOUNDS, LIGHTER WEIGHT

The introduction of our new SCF foam reduces overall pad weight while amplifying rebound performance. This advanced material delivers faster, more controlled rebounds that kick pucks out of danger, giving goalies a crisp, responsive feel and the confidence to direct play while moving efficiently across the crease.

2

POST CONNECTION SYSTEM

The patented PCS toe bridge is specifically designed to optimize post seal and improve energy transfer when in the RVH position. By providing goalies with a stronger push-off the post, the system enhances stability and control during one of the most critical movements in the modern game.

3

KNEE STACK RIGIDITY AND ADJUSTABILITY

The adjustable stiffness knee stack allows goalies to fine-tune their setup by tightening or loosening an integrated strap to achieve their desired stiffness. This customization delivers the perfect balance of comfort and responsiveness, no matter the style of play.

HZRDUS

GOALIE GEAR

ENGINEERED FOR BETTER REBOUND CONTROL

Featuring a flat face construction that minimizes gaps and maximizes coverage, combined with a reinforced composite thigh rise for ultimate rebound control, the HZRDUS px4 goalie pads allow you to confidently redirect pucks where and when desired.

FRS (FAST ROTATION SYSTEM)

Located on the calf, FRS includes double internal adjustable straps for increased stability and even weight distribution profile to the Thick Mid Stiff option.

1

NEW COMPOSITE THIGH RISE CORE

A 30% increase in thigh rise stiffness is paired with a more rigid knee stack, enhancing seal to the ice when dropping down and facilitating easier redirection of pucks.

2

THINNER THIGH RISE

A 40% thinner thigh rise provides ease in pad overlap when standing up or in butterfly. The pads are more reactive when dropping down and popping back up from the ice, giving greater mobility in game situations.

3

FLAT FACE CONSTRUCTION

Maximizes coverage and enhances rebound control. Eliminates pucks slipping through, as the flat face design provides a solid barrier, leaving minimal room.

HRDUS PX4/L95

CATCHER SIZE CHART

HAND WIDTH (")	< 3	3-3.5	3-3.5	> 3
GLOVE SIZE	JR	INT	SR S	SR M - L

Hand width is measured at the base knuckles.

BLOCKER SIZE CHART

HAND LENGTH (")	6-6.5	6.5-7	6.5-7	7-7.5	7.5-8	8-8.5
GLOVE SIZE	JR	INT	SR S	SR M	SR L	SR XL

Hand length is the distance from the middle finger tip to the bottom of your palm.

The above charts are a guide that will help position each goalie with the right equipment. However, there may be instances where the suggestions are not applicable to an individual player for a number of reasons. We strongly encourage all consumers to consult their local authorized TRUE retail staff who can help validate final gear choice for each individual player's needs.
